DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, 19, and 20, drawn to a greenhouse system, classified in class 47, subclass 17.
 - II. Claims 14-18, 21, and 22, drawn to a method of growing plants, classified in class 47, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

2. **Inventions II and I** are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus or by hand such as using a system without having to provide a structure for embedding a water flow system to the plant box.

3. Furthermore, if **Invention I** is selected then **a further election (elect either Invention IA or Invention IB below)** is required to the following inventions:

- IA. Claims 1-13, drawn to a greenhouse system, classified in class 47, subclass 17.
- IB. Claims 19 and 20, drawn to a plant box, classified in class 47, subclass 65.5.

Art Unit: 3644

Inventions IA and AB are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it does not require the plant box having at least one groove in the bottom surface. The subcombination has separate utility such as for use as a receptacle for store goods instead of a plant box.

4. Furthermore, if **Invention II** is selected then **a further election (elect either Invention IIA or Invention IIB below)** is required to the following inventions:

IIA. Claims 14-18, drawn to a method of growing plants, classified in class 47, subclass 17.

IIB. Claims 21 and 22, drawn to a plant, classified in class 800, subclass 295.

5. **Inventions IIA and IIB** are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as growing the plant in the open field/farm and watering the plant by hand.

Art Unit: 3644

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
